

Save the Date

Tuesday 7th and Wednesday 8th of March 2023 Eugenides Foundation Conference Center Auditorium

On behalf of the Organizing Committee, we are pleased to invite you to the 8th International Symposium and Maritime Exhibition on Ship Operations, Management and Economics (SOME) 2023. The Symposium has been taking place for over 15 years, is now scheduled to take place in Athens, at the **Eugenides Foundation Conference Center Auditorium on Tuesday 7th and Wednesday 8th of March 2023.**

A bi-annual event organized by the SNAME Greek Section, the Symposium brings together academics, ship operators, technical managers, naval architects, marine engineers, classification societies, and marine transportation policy-makers to discuss and debate important current issues for the maritime industry.

SOME 2023 will be hosted **Free of Charge** for all, both members and non-members of SNAME, and is committed to providing Maritime Professionals and Students with continuous opportunities to develop their knowledge, stay up-to-date on international engineering and operational development, and interact with marine industry key stakeholders.

The 31 Peer-Reviewed Papers of SOME 2023 cover the following topics:

- Emission Control, CII Compliance
- Decarbonization, Alternative Fuels
- Digital Twins, Performance Optimization
- Ship Resistance & Propulsion for Green Shipping
- Ship Propulsion, Autonomous Shipping
- Ship Design and Engineering
- Marine Pollution
- Data Science, Real-time Monitoring

The Symposium will host two Keynote Lectures and two Industry Panel Discussions:

Keynote Lectures:

Shipping Decarbonization: A Glimmer of Hope?

H. Psaraftis, Professor,

Technical University of Denmark

Maritime Training in Soft or Hard Skills?

S. Hatzigrigoris,

Advanced Engineering Services

Industry Panel Discussions:

Women in Maritime

Moderator: Niki Kalogiratos, Chief Communications
Officer, Capital Ship Management Corp

Electrification in Shipping

Moderator: J. Prousalidis,
National Technical University of Athens
