

JOB OPENING

HELINTEC SA is an engineering company with activities extending over a range of software products, consultancy, and technical services for the marine industry. Our main activity is the development of specialized software products with numerous installations onboard vessels and in shipping companies.

We are seeking a naval architect or mechanical engineer (TEI, UNIWA) to be a part of the production team of our marine load planner.

Prerequisites:

- Very good understanding of vessel's drawings and manuals.
- Familiarization with computers, knowledge of CAD Packages
- Good knowledge of English.

Description:

The successful candidate will be trained on our company's CAD system, for the preparation of vessel's hull model, and gradually will be trained on the required vessel preparation for the planner.

What we offer:

- Very good environment
- Continuous training
- Flexible working hours
- Savings plan

The offer is for a *permanent* position and not for internship.
